	<p>CHANTIX PAC 0.5 & 1MG: MAX QTY=1 PER Year</p> <p>Nicotrol Nasal Spray: 90 days of therapy allowed per 365</p> <p>Inhaler: 90 days of therapy allowed per 365</p> <p>Patch: 90 days of therapy allowed per 365</p> <p>Gum: 20 per day, 90 day of therapy allowed per 365</p> <p>Lozenges: 24 per day, 90 days of therapy allowed per 365</p> <p>Zyban: 2/day, min age 13, 90 days of therapy allowed per 365</p>			
Coventry Cares of Kentucky	<p>Covered Drugs</p> <p>NRT Patches, lozenges, and gum and bupropion.</p>	None	<p>Chantix is non-preferred, although they will continue to cover the drug for members transitioning in for the full three months (their summary doesn't say whether they'll consider our coverage prior to transition to count toward that three months). Extension beyond the three months will require PA. New starts on Chantix after transition will also require PA; the provider will have to provide the necessary medical support for choosing the drug. They will refer to KY Quit Line and employ 1:1 nursing intervention (telephonic, face-to-face education), member educational mailings, coordination with PCP for medication, and nursing follow-up at regular intervals.</p>	1-855-300-5528

Passport Health Plan	Covered Drugs Chantix, Nicotine gum, Nicoderm Patches (step down process: 21 mg, 14 mg, and 7 mg patches)	None	In addition to the medications, we offer the Yes, You Can! 12 week smoking cessation program is a voluntary program for members of the plan age 18 and older (and not pregnant). Members have several choices for participation; the member has the option of getting the medication and receiving educational material including resources such as Cooper Clayton classes and the KY Quit Line. In the plan's collaborative agreement with Walgreen's Pharmacy, members may also receive one-on-one counseling at point of sale with a pharmacist or enroll in the Yes, You Can! smoking cessation program offered by the plan where the member receives telephonic cessation support/coaching by an assigned care manager. Members may decline support/coaching, however, smoke-free status is obtained at 12 weeks and followed up by PHP stall at 6, 9. And 12 month period.	1-877-903-0082
WellCare	Covered Drugs NRT patches, bupropion, bupropion SR and XL, and Chantix. Any other tobacco cessation products would be available if approved via company's Drug Evaluation Review process. Transition: during the first 93 days of enrollment, members can get a one-time fill for a 31-day supply of any non-PDL drug or PDL drug that would normally require PA.	None	They will refer to KY Quit Line and employ 1:1 nursing intervention (telephonic, face-to-face education), member educational mailings and coordination with PCP for medication, and nursing follow-up at regular intervals	1-866-635-7045 TTY 1-877-247-6272
